

National park enjoyment experience

Vegetable harvesting the four seasons and Unagi hot spring experience

Ibusuki is a town with tourism and agriculture as two major industries. Okra and Broad bean are the largest production in Japan, and there are many hot springs with different spring quality, including natural sand bath.

In particular, there is a natural kamad called “sume”, and you can experience steaming vegetables and eggs of the four seasons with steam.

At a farmhouse near the unagi hot spring, after harvesting seasonal vegetables, we have the “sume” experience.

Please refresh your mind and body at the Unagi hot spring that Takamori Saigo loved
